CCKEYS

Key and Asset Management **Solutions**

“ We have a 30-year track record of supporting our customers in making efficiency savings within their companies. Our commitment to keeping pace with the ever-changing world of business and technology is what will drive us forward for the next 30 years. ”

Mark Ritson, Managing Director.

We are CCKeys – specialists in the development, manufacture and supply of key and asset management systems. Established in 1983, we are the UK's leading key and asset storage manufacturer.

All of our systems are built to the very highest standards and utilise the latest developments in key and asset storage technology.

Automotive

Used by car dealerships, controlling from 10's to 1,000's of keys across various departments and sites.

Healthcare

Hospitals and care homes manage keys, medical equipment and medicine.

Police

Control large quantities of vehicles keys and policing equipment.

Industrial Manufacturing

Lock down or secure high risk machinery for allocation, repairs and cleaning.

Property and Construction

Manage site areas, property keys and machinery.

Airports

Control restricted areas, ground crew and vehicle keys.

Hospitality

Assist Hotels and temporary accommodation with managing both in and out of hours check-ins.

“

CCKeys Ltd has been instrumental in supporting BAE Systems at its Rochester site in Kent towards developing secure key storage solution using the Smartbox system. The comprehensive package of products and services provided by CCKeys, ensures that the Rochester site remains compliant for the foreseeable future within a complex environment where the security of its employees and visitors is paramount. ”

BAE Systems – Facilities Management

Keymanager | Simple and secure key management

Get up and running in no time with the simple to use peg in, peg out system.

Minimal training is required, just attach your key(s) to a Retention Peg via an Anti-Tamper Seal, then allocate Access Pegs to your authorised users. That's it, you're good to go.

Key Features:

- Only authorised users have access
- Save time and money by reducing time to locate keys
- Smart, easy to clean ABS plastic finish
- Wall fitting and compatibility with our secure key cabinets

As simple as 1, 2, 3, 4.

- 1 Insert your unique Access Peg into the right-hand port
- 2 Rotate anti-clockwise to release the Retention Peg and key from the board

- 3 When ready to return the peg
Insert the Retention Peg and key into the left-hand port of the corresponding number
- 4 Turn the access peg clockwise to release your unique access peg.

Product Name	Product Code	Max Keys	Dimensions (Height x Width x Depth)	Includes

CCK-1025A – Max 25 Keys
660mm Wide x 400mm High
x 300mm Deep

Max capacity comprises of a 25 Keymanger board on the Cabinet Backplate.

Smartbox | Intelligent Key Management

Intelligent Key Management

The CCKEYS Smartbox is an intelligent, fully electronic, key management system. The Smartbox records electronically what time and date keys were taken by which user. The cabinet is fully administered via the KeyWin software application, online or offline. The Smartbox fully automates key management and security, providing users with up-to-date information on key movement and history.

Intelipegs

Each key is attached to an electronic peg called the 'Intelipeg'. The peg will hold details of the key, set by the user.

Locking / Unlocking System

The Smartbox can be configured with either Unlocking or Locking strips. Systems can be configured with a mixture of both locking and unlocking strips, up to a maximum capacity of 462 (33 strips) per cabinet.

The locking strip physically restricts which keys a user can take. If they have not been authorised the key / Intelipeg cannot be removed from the cabinet.

The unlocking strip offers flexibility to organisations that do not wish to restrict physical access to keys but need an audit trail of key movement / activity.

Cabinet Entry Systems

The CCKEYS Smartbox hosts a range of entry options. As standard users access the cabinet with their unique 4-digit PIN code. Other options include:

1. RFID Card / Fob Entry
2. Biometrics Fingerprint
3. Alcolock

Entry PIN Code / Fingerprint reader / Card Reader

Unlocking peg, Locking Peg

CCK-1090E Cabinet 168 Key Positions. (Cabinet Maximum Capacity 238 Keys). Model displayed features optional fingerprint reader entry.

50

How can Smartbox help your business?

Audit trail of who has taken which key and when it was removed or returned

- Staff are accountable for the keys they take
- Save money replacing keys and locks due to misplaced or lost keys
- Improve security of keys
- Increase operational efficiency, reducing the time spent looking for lost keys
- Reduce downtime wasted locating keys
- Ensure only authorised users have access to certain keys. Cabinet Entry Systems

Solutions for all Industries

CCKeys understand that all CCKeys understand that all businesses are different, and each industry has a unique key management solution. Below are some of the industries that operate the Smartbox.

900mm Wide x 1,400mm High x 300mm Deep
Cabinet capacity range 1 – 322 keys. Increase of 1 – 462 available with reduced space between rails

Keys spaced at 75mm

Software

KeyWin 6

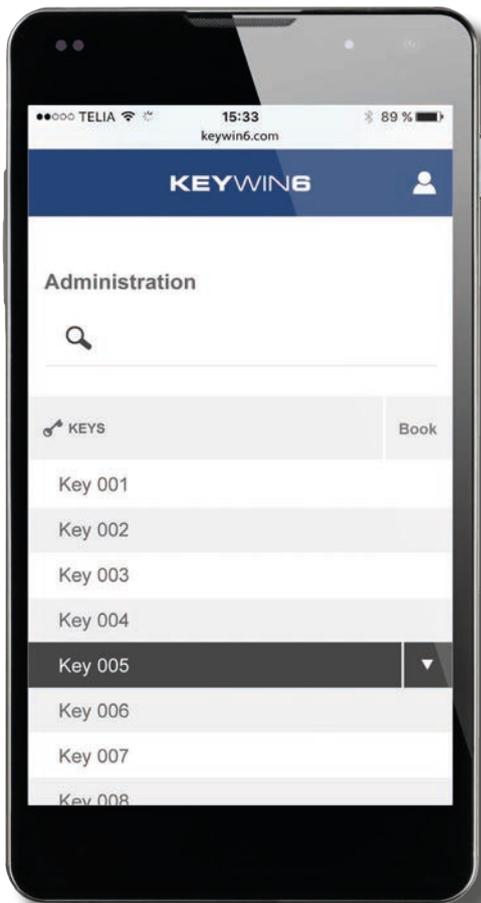

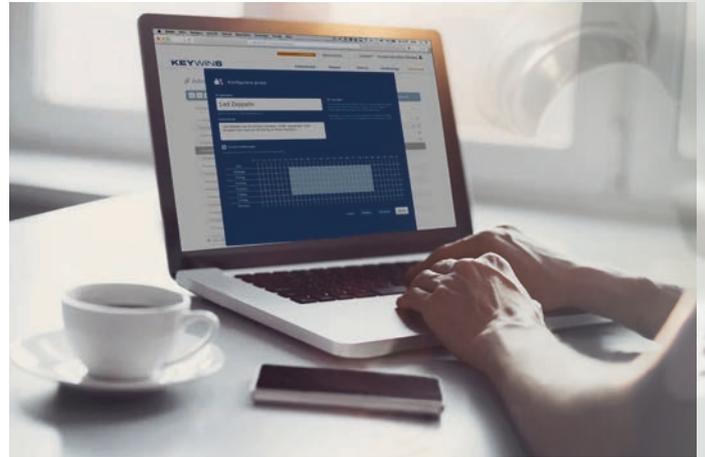

KeyWin 6 is the latest instalment of the KeyWin software. The Smartbox cabinet communicates with software, uploading events such as when a key was removed / returned. KeyWin 6 displays all cabinet data on a clear Event Log page, where users can search for certain events.

Cloud-based or on-Premise Software

KeyWin 6 can be accessed via a secure website to make administration changes to the cabinet, for instance, setting up a new user or granting access to a key. KeyWin 6 can also be installed locally on a compatible server. KeyWin 6 web can be accessed by a computer, Smartphone or tablet.

Firmware / Software Updates

Firmware updates are downloaded installed automatically on the cabinets improving and added new features to the system

Automotive software available

The purchase, planning and installation of our Smartbox systems went very smoothly with no hitches and it worked straight out of the box.

It has attracted universal praise for its ease of operation and efficiency and has already significantly improved our vehicle key security and, more importantly, historical accountability.

Hackney Council – Andy Wells – Service Manager

Capital Living is a managing agent of 50 HMO properties in London. We had problems tracking keys out with contractors and previously it relied on someone booking them out and checking them in, a very time-consuming process and only available between office hours. After looking at a few key tracking options, CCKEYS were the best value and offered a very comprehensive solution that people can now access 24/7. Their support has been excellent, and I would hesitate to recommend their service to anyone. Looking for a smart way to track and manage their keys.

Capital Living UK – Adam Goff – Founder & CEO

Trade Plate Manager | Track and secure trade plates

Control

Always losing trade plates? The Trade Plate Manager is a secure holder that not only keeps them tidy and in one place but also tracks who has them when they are being used. It ensures your trade plates are always readily available.

Using the same peg system as Keymanager, the Trade Plate Manager is a perfect addition to any automotive retailer.

Features:

- Only authorised users have access
- One Access Peg releases both plates
- You always know who has the trade plates
- Securely displayed and available
- Easily mounted to any wall
- The user's Access Peg is only released when both trade plates are returned

Trade Plate Manager

Trade Plate Rubber Holders

Services Knowledge, support and professionalism

Installation and maintenance

Our dedicated team of engineers and technicians have the experience and training to install and maintain your key management system to the highest level.

Installing security equipment requires the ability to select and use materials, tools and equipment appropriate for the job. Who better to install your key management system than the people who build it?

Warranty

All our key cabinets come with 5-year manufacturer's warranty.

*warranty on locks limited to 12 months
